A number of studies have been excluded due to various reasons including the following:

- Wrong study designs, where studies were designed to test the specific intervention rather than general palliative care input.
- Wrong population: generally, outpatients.
- Studies not designed to evaluate impact of early palliative care intervention.
- Studies based in oncology clinics and not acute hospitals.

Disclaimer: Palliative Care Evidence Review Service (PaCERS) is an information service for those involved in planning and providing palliative care in Wales. Rapid reviews are based on a limited literature search and are not comprehensive, systematic reviews. This review is current as of the date of the literature search specified in the Review Methods section. PaCERS makes no representation that the literature search captured every publication that was or could be applicable to the subject matter of the report. The aim is to provide an overview of the best available evidence on a specified topic using our documented methodological framework within the agreed timeframe.
